STIPULATIONS:

To participate in Delmarva Power Business Instant Discounts, equipment must be installed in a commercial or industrial facility within the Delmarva Power service territory. Facility must have an active Delmarva Power commercial or industrial electric account number and be located within the state of Maryland. Participants receiving discounts may include business customers of Delmarva Power and/or Service Providers. Participants are not eligible to receive additional utility program incentives through the Business Instant Discounts Program or another EmPOWER Maryland program for the same equipment. Plug and Play LED products may not be compatible with certain ballasts. Participants should consult with their Service Provider prior to purchasing product to determine product's compatibility with the existing ballast and whether a ballast replacement is recommended. A sales order verification or site inspection from a program representative may occur to verify purchase and/or installation of equipment. Failure to comply with program terms and conditions can result in forfeiture of these incentives and future participation in Delmarva Power energy-efficiency programs.

Capital Electric is not responsible for typographical errors or misprints. Products subject to change without prior notice. This program may change or end at any time. Please speak to your Capital Electric Sales Representative for more information.
